SOHO Daily Meeting Minutes for Thursday 02 June 2005

ANNOUNCEMENTS

-----

- \* The HGA Y axis was successfully moved today using APME A for the first time since the turn-on last Thursday. The direction was toward the center position, just enough to see a fine pulse counter signal. The fine pulse counter signal was received 3 or 4 steps earlier than expected, and this is being looked into.
- \* 26m keyhole begins on Sunday. Please consider doing engineering studies etc. this week to minimize the amount of special commanding required during the keyhole.
- \* The keyhole schedule has been changed. We will send out a new plan as soon as we have it. The new plan involves staying in submode 5 throughout most of the keyhole.
- \* The current RHESSI default target is AR10772. When selecting this target to maximize coordination w/others, use campaign number 6850.
- \* Reminder: There will be no SOC office staffing today, after 4:30 pm local time. Limited hours on Saturday, and no staffing on Sunday. If you need a SOC, let us know and we will arrange to be here.
- \* Commanding times for next week:  
During keyhole all NRT should be coordinated with SOC's.
